

## Science and Technology

### Speaking Part 1

Imagine that you are preparing a project with your friend. You have found some interesting material for the presentation and you want to read this text to your friend. You have 1.5 minutes to read the text silently, then be ready to read it out aloud. You will not have more than 1.5 minutes to read it.

Russia has made significant strides in the field of science and technology in the past decade, investing heavily in research and development. From 2014 to 2024, the country has achieved several notable achievements in different areas. In space technology, Russia has launched successful missions including the Angara-A5 rocket in 2014 and sent the first humanoid robot FEDOR to the International Space Station in 2019. In nuclear technology, Rosatom, the country's state-run nuclear energy corporation, has become the world's largest nuclear energy producer and developed new technologies such as small modular reactors that have the potential to revolutionise the nuclear power industry. In medicine, Russian scientists have developed new drugs and treatments for various diseases and made progress in regenerative medicine, successfully growing artificial organs in the lab. Russia's investments in science and technology have led to notable advancements in various fields.

### Speaking Part 2. Task 1

Study the advertisement.

Make your life easier with a new mobile phone!

You are considering buying the appliance and now you'd like to get more information. In 1.5 minutes you are to ask four direct questions to find out about the following:

1. price;
2. if one can buy it online;
3. number of functions;
4. guarantee period.

You have 20 seconds to ask each question.

## Speaking Part 2. Task 2

Study the advertisement.

Sale in our shop! Don't miss it!

You are considering buying a new computer and now you'd like to get more information. In 1.5 minutes you are to ask four direct questions to find out about the following:

1. models available
2. features
3. memory
4. length of sale

## Speaking Part 3. Task 1

You are going to give an interview. You have to answer five questions. Give full answers to the questions (2–3 sentences). Remember that you have 40 seconds to answer each question.

### Tapescript for Task 3

**Interviewer:** Hello everybody! It's Teenagers Round the World Channel. Our guest today is a teenager from Russia and we are going to discuss science and technology. We'd like to know our guest's point of view on this issue. Please answer five questions. So, let's get started.

**Interviewer:** How will science change our world in the future?

**Student:** \_\_\_\_\_

**Interviewer:** What do you think is the most important invention? When was it created?

**Student:** \_\_\_\_\_

**Interviewer:** What do you think robots should be used for? Will they do all work in the future?

**Student:** \_\_\_\_\_

**Interviewer:** Do you think using cell phones too much is bad for our physical or mental health? Why or why not?

**Student:** \_\_\_\_\_

**Interviewer:** Do you think modern technology reduces or increases stress? What can teenagers do to limit the time using modern technologies?

**Student:** \_\_\_\_\_

**Interviewer:** Thank you very much for your interview.

### **Suggested answers for Speaking Part 2. Task 1:**

1. What's the price of the mobile phone?
2. Can I buy this mobile phone online?
3. How many functions are there in the mobile?
4. What is the guarantee period if anything breaks down?

### **Suggested answers for Speaking Part 2. Task 2:**

1. What models of computers are available in your shop?
2. What features do the computers have?
3. How much memory do the computer have?
4. How long does the sale last?

### **Suggested answers for Speaking Part 3. Task 1:**

1. I believe we'll have more devices that will make our lives easier. I guess people will work less than now.
2. I believe the most significant invention was the Internet. It changed people's life forever. It was created in the 20<sup>th</sup> century.
3. I think robots should be used for all kinds of household chores. They should also be used in production line. However, I don't think they will do all work in the future. They will not be able to do some activities that require considerable analytical skills.
4. I don't think that using cell phones too much is bad for our physical or mental health. People have used mobile phones for more than 20 years now and I've never heard that anyone has gone crazy because of this.
5. In my opinion, modern technology reduces stress. It gives people more free time to do the things they want. To limit the time using modern technologies, teenagers should hang out more with their friends.

### **Speaking Part 3. Task 2**

**You are going to give an interview. You have to answer five questions. Give full answers to the questions (2–3 sentences). Remember that you have 40 seconds to answer each question.**

#### **Tapescript for Task 3**

**Interviewer:** Hello everybody! It's Teenagers Round the World Channel. Our guest today is a teenager from Russia and we are going to discuss inventions. We'd like to know our guest's point of view on this issue. Please answer five questions. So, let's get started.

**Interviewer:** Have you ever been interested in science? What about your friends?

**Student:** \_\_\_\_\_

**Interviewer:** What famous Russian scientists do you know? What did they invent?

**Student:** \_\_\_\_\_

**Interviewer:** How has the life changed since their invention?

**Student:** \_\_\_\_\_

**Interviewer:** What kind of device should be invented next? How will it be used?

**Student:** \_\_\_\_\_

**Interviewer:** What kind of device would you choose to prepare a project about?

**Student:** \_\_\_\_\_

**Interviewer:** Thank you very much for your interview.

### Speaking Part 4. Task 1

Imagine that you and your friend are doing a school project "Modern technology". You have found some photos to illustrate it but for technical reasons you cannot send them now. Leave a voice message to your friend explaining your choice of the photos and sharing some ideas about the project. In 2.5 minutes be ready to:

- explain the choice of the illustrations for the project by briefly describing them and noting the differences;
- mention the advantages (1–2) of the two types of phones;
- mention the disadvantages (1–2) of the two types of phones;
- express your opinion on the subject of the project – whether it would be a disadvantage for you to use an old type of phone presented in the picture and why.

You will speak for not more than 3 minutes (12–15 sentences). You have to talk continuously.

### Speaking Part 4. Task 2

Imagine that you and your friend are doing a school project "Modern inventions". You have found some photos to illustrate it but for technical reasons you cannot send them now. Leave a voice message to your friend explaining your choice of the photos and sharing some ideas about the project. In 2.5 minutes be ready to:

- explain the choice of the illustrations for the project by briefly describing them and noting the differences;
- mention the advantages (1–2) of the two types of modern inventions;
- mention the disadvantages (1–2) of the two types of modern inventions;
- express your opinion on the subject of the project – which modern invention presented in the pictures you'd prefer and why.

### **Suggested answers for Speaking Part 3. Task 2:**

1) I've always been interested in science. I think it's very important. My friends are interested in science, too.

2) I think the most famous one is Dmitriy Mendeleev who formulated the Periodic Law. He created his own version of the periodic table of elements.

3) New elements are used in different devices. Besides, now scientist know that they still need to discover certain elements and they have something to do.

4) I think people need to invent a device so that we could communicate by just thinking of something without saying the words. It will probably be a device attached to our heads.

5) I've always been curious about how mobile phones work. It would be interesting to prepare a project about that. I would tell my classmates how we call, text and receive messages. It's still magic for me.

### **Sample answer for Speaking Part 4. Task 1:**

Hello, Kolya, this is Petr. I'm calling because I've found two suitable pictures for our project 'Modern technology.'

I guess the pictures are just right because in the first one I can see a girl talking on a very old type of phone my grandma used to use. In the second picture there's someone dialing a number on a modern iPhone for a little girl who's holding it. The difference between the pictures is immediately noticeable. The girl in the first picture is already using the device whereas the girl in the second photo is just about to call someone.

There are some advantages of using both of the types of phones. If one uses an old phone, they are not usually distracted by any extra sounds when talking. This is what may happen with modern phones, unfortunately. Using a smartphone, on the other hand, is quite beneficial. Not only can a person make phone calls, but they can also text, use the Internet and even play games, which is a lot of fun.

However, both kinds of devices have their disadvantages as well. The sound may not be very clear when you use an old phone and you cannot walk to any part of the flat because of the wire. As for modern phones, they may cause addiction. Many people wake up and the first thing they do is using their phone. This does not sound normal to me.

For me, it would be a disadvantage to use an old type of phone. I'm used to texting my friends every day and I would be quite disappointed not to be able to do it.

What do you think of the pictures? Shall we use them in our project? Call me back in the evening and let's discuss it. Bye.

### **Suggested answers for Speaking Part 4. Task 2:**

Hi Lilia, it's Pasha. I've found good pictures for our project 'Modern inventions'. Let me tell you about them.

I think both of the pictures are perfectly suitable for our project because they both illustrate modern electronic devices. In the first one, there's a robot vacuum near a woman sitting on the sofa and talking on the phone. The second picture illustrates a woman, sitting next to a washing machine. There is a noticeable difference between these electronic devices shown in the pictures. The washing machine takes up a lot of space while the robot vacuum is quite portable.

I want to tell you about some upsides of using these devices. One of the advantages of washing machines is that people can wash their clothes quickly, and they shouldn't do it themselves. So, it saves a great deal of time. As for robot vacuums, they work automatically.

You can adjust the settings once and enjoy your clean flat.

On the other hand, there are some disadvantages of the two types of modern inventions. Washing machines are usually quite noisy. Robot vacuums can get stuck in some places or get lost in your flat, so you have to help them sometimes find the way out.

If you ask me, I'd prefer a robot vacuum. My mom makes me Hoover our flat all the time and I hate it. An automatic device would be of great help.

That's all for now, call me back and tell me what you think about the pictures. Bye.

### Writing an email. Task 1

Read the following task and the suggested answer below. Fill in the gaps with the words in the box. Some words should be used more than once.

You have received an email message from your English-speaking pen-friend Ben:

**From:** Ben@mail.uk

**To:** Russian\_friend@ege.ru

**Subject:** Science and technology

... I've just bought a new mobile phone and it is great! Do you get excited about new technology, and why? How much time do you spend online every day? What are your favourite websites?

Last week I went to the science museum ...

Write an email to Ben.

In your message:

-answer his questions;

-ask 3 questions about his museum visit.

Write **100–140 words**.

Remember the rules of email writing.

|               |            |         |        |           |
|---------------|------------|---------|--------|-----------|
| knowledgeable | technology | receive | daily  | memorable |
| cool          | mobile     | visited | useful | inventor  |
| spend         | articles   |         |        |           |

Dear Ben,

Thanks a lot for your email. I was really glad to \_\_\_\_\_ it.

That's \_\_\_\_\_ that now you've got a new \_\_\_\_\_.

In your email you asked me a few questions about \_\_\_\_\_. Well, I always get excited about new \_\_\_\_\_ as I want to become an \_\_\_\_\_. I hope I'll also be able to invent something \_\_\_\_\_. I spend almost all day online, about 7 hours \_\_\_\_\_. I read \_\_\_\_\_ on different websites. This is why I'm so \_\_\_\_\_. My favourite websites are theguardian.com and bbc.co.uk where I learn English.

By the way, it's great that you \_\_\_\_\_ the science museum last week. How much time did you \_\_\_\_\_ there? Did you go alone or with friends? What was the most \_\_\_\_\_ object you saw?

Write back soon.

Best wishes,

Maria

### Answers for Writing an email. Task 1:

Dear Ben,

Thanks a lot for your email. I was really glad to receive it. That's cool that now you've got a new mobile.

In you email you asked me a few questions about technology. Well, I always get excited about new technology as I want to become an inventor. I hope I'll also be able to invent something useful. I spend almost all day online, about 7 hours daily. I read articles on different websites. This is why I'm so knowledgeable. My favourite websites are theguardian.com and bbc.co.uk where I learn English.

By the way, it's great that you visited the science museum last week. How much time did you spend there? Did you go alone or with friends? What was the most memorable object you saw?

Write back soon.

Best wishes,  
Maria

134 words

### Writing an email. Task 2

You have received an email message from your English-speaking pen-friend Richard:

**From:** Richard@mail.uk

**To:** Russian\_friend@ege.ru

**Subject:** Science Museum

... Many of my friends enjoy going to the Science Museum, and I like it too.

What is your attitude to science? Is it popular to study it in your country? Why or why not? What scientists do you know?

Next week I'm going to join the local drama club...

Write an email to Richard.

In your message:

- answer his questions;
- ask 3 questions about the drama club.

Write **100–140 words**.

Remember the rules of email writing.

## Writing Task 38. Task 1

Here are the requirements of Text Organisation. You can get up to 3 points if you follow them.

1. All sentences should be logical;
2. The structure follows the plan;
3. Visible paragraphs;
4. Appropriate linking words and phrases;
5. Introduction and conclusion.

Look at the following essay written by a student. Find 6 mistakes that violated the rules of Text Organisation.

I am doing a project on how young people in Zetland celebrate the New Year. I have found some data and want to analyse it.

To begin with, teenagers in Zetland spend the New Year in different ways. First of all, the table shows that 68% of the teenagers have a family dinner, while only 16% go for a walk with friends. And only 5% eat out in a cafe.

Comparing all these features, it is necessary to say that there are more teenagers who have a party at friends' homes (9%) than teenagers who travel to another city or country (2%). This seems reasonable as it is expensive to go abroad, while celebrating the New Year at a friends' place is cheap. They may have a potluck.

While I was working on the project, I found a problem that can arise during New Year celebration. I think some teenagers might want to celebrate it with their friends, but they are not allowed to do so by their parents. To avoid this problem, it is better not to make plans with friends.

Summing up, I think the best way to celebrate the New Year is to be with your family because you can feel positive emotions and share your wishes with them.

212 words

Now look at the task for the 4<sup>th</sup> paragraph. Has the student addressed it in the right way?

Outline a problem that can arise with celebrating New Year and suggest a way of solving it.

Write your own problem and solution to the task.

---

## Sample answer for Writing an email. Task 2

Dear Richard,

Thanks a lot for your email. It's so wonderful when you drop a line.

In your last email you asked about my attitude to science. I think it's very important in the modern world as it helps maintaining progress. I don't want to be a scientist though as this job is paid poorly. I don't think it's popular to study science in my country for this reason but people do it as a hobby. There are lots of famous scientists I know, e.g. Mikhail Lomonosov, Nikolay Lobachevsky, Dmitri Mendeleev and others.

By the way, tell me about that local drama club you're going to join. How many people work there? What is the time of the lessons? How many participants are there in each group?

Hope to hear from you soon.

Best wishes,

Lena

(136 words)

## Answers for Writing Task 38. Task 1:

I am doing a project on how young people in Zetland celebrate the New Year. I have found some data and want to analyse it.

To begin with, teenagers in Zetland spend the New Year in different ways. First of all, the table shows that 68% of the respondents have a family dinner, while only 16% go for a walk with friends. And only 5% eat out in a cafe.

Comparing all these features, it is necessary to say that there are more teenagers who have a party at friends' homes (9%) than teenagers who travel to another city or country (2%). This seems reasonable as it is expensive to go abroad, while celebrating the New Year at a friends' place is cheap. They may have a potluck.

While I was working on the project, I found a problem that can arise during New Year celebration. I think some teenagers might want to celebrate it with their friends, but they are not allowed to do so by their parents. To avoid this problem, it is better not to make plans with friends.

Summing up, I think the best way to celebrate the New Year is to be with your family because you can feel positive emotions and share your wishes with them.

212 words

1. To begin with... First of all... - it's wrong to use two of the linkers in one paragraph as their meaning is the same.
2. Mentioning the respondents without mentioning 'a survey' in the 1st or the 2nd paragraph.
3. 'And' at the beginning of the sentence – you cannot start sentences with 'and', 'but' or 'because' in EGE essays.
4. Comparing all these features, - the student does not compare the features already mentioned in the essay. Using the word 'these' in this context is wrong.

5. While I was working on the project, I found – a logical mistake. At the beginning of the essay the student writes that he/she is doing a project but it seems that the project has already been finished in the 4<sup>th</sup> paragraph. One should not use different tenses.
6. Students cannot use such linking expressions as 'summing up' or 'to sum up' in EGE essays as they do not summarise information in the conclusion. They conclude by introduce their opinion on the question from the task.
7. The last paragraph consists of one complex sentence, which is all right in EGE essays.

P.S. There is such a requirement as a thesis statement at the beginning of the essay. However, in writing Task 38 EGE it is optional. 'Data' in modern English can be both plural and singular (want to analyse it – correct).

The student refers to teenagers but the task is broader. One should refer to all people in general. However, it is possible to change it only a little, e.g. some people want to celebrate the New Year with friends while others prefer to stay at home. This may lead to an argument.

Write your own problem and solution to the task.

### **Celebrating New Year:**

There is a problem that occurs in almost all cities while the New Year is celebrated. Many people like to set off fireworks all night long, while others prefer to sleep during the night. The explosion of fireworks is usually very noisy which may prevent people from falling asleep. To tackle the problem, governments should forbid to let off fireworks next to blocks of flats so that people are not disturbed at any time.

### **Real-life Task 38**

Quick questionnaire

Follow the QR-code link or the link below. Answer the question about the most influential Russian innovation and see the results of other students.

Take a picture of the results and write your data description. Compare two figures and give a comment. Since it's a real-life opinion poll, the results change all the time, so you can do the task again in a while. Keep in mind that the respondents are Russian teenagers.

Address the following:

- outline a problem that can arise with using innovations and suggest a way of solving it;
- conclude by giving and explaining your opinion on the role of innovations in our lives.

<https://forms.gle/7sD3PfWNMLYd5wQt8>

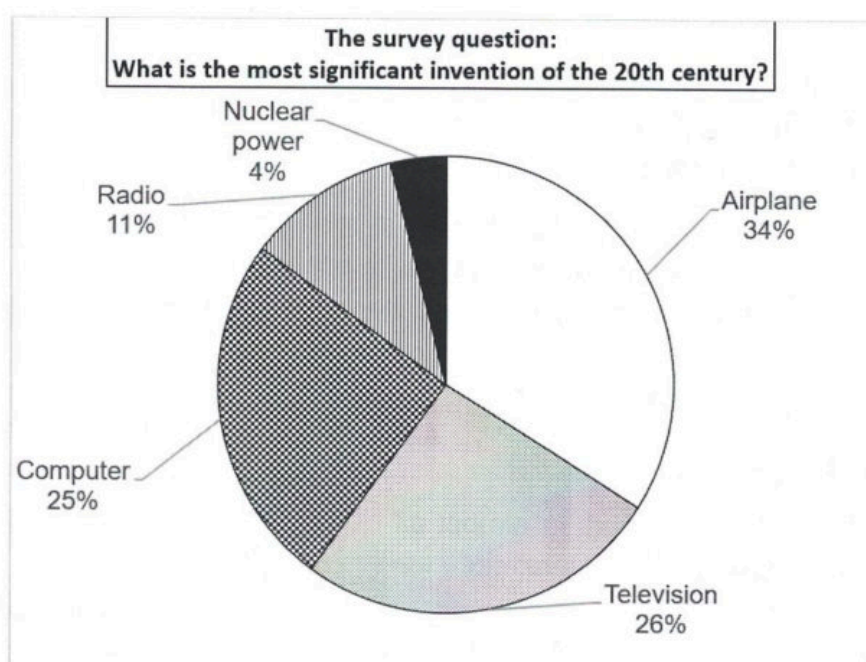

## Writing Task 38. Task 2

Look at the task. Read the suggested answer and choose the correct option.

Imagine that you are doing a project on **Zetlanders' opinion on the most influential invention of the 20<sup>th</sup> century**. You have found some data on the subject – the results of a survey (see the pie chart below).

**Comment on the survey data and give your opinion on the subject of the project.**

Many inventions have been\were introduced from 1900 to 1999. I am currently doing a\the project on the\- Zetlanders' opinion on the most influential invention of the 20<sup>th</sup> century and I have found some results of a survey in a\the form of a\the pie chart.

As can\could be seen in the statistics, approximately the same number\amount of the respondents say that a\the television and a\the computer has influenced the world the most (26% and 25% respectively). Only 4% choose nuclear power.

Predictably, more than three times as many of the respondents choose the airplane to be the most influential invention of that period of time (34%) as those who say that it is the radio (11%). It is probably because a\the airplane gives people an opportunity to travel all around the globe while a\the radio is just a mean\means of entertainment.

New inventions usually bring\brought many opportunities\possibilities to people but it\there could be a problem that is not easy to resolve. If an\the invention is new, it may not have gone\go through proper approbation and might do\make harm to people. For instance, a few years ago it\there was a telephone that exploded accidentally. To tackle the problem, organisations should buy\sell a limited amount\number of devices to check that they are safe for all people.

To conclude, I believe\I would like to say that inventions are of an\- utmost importance to society. Technological advancements are essential for the better world that every one of us want\wants to live in.
